I'm only a day in so far but [@openai](#)'s deep research and o3 is exceeding the value of the \$150K I am paying a private research team to research cranio-pharyngioma treatments for my daughter.

\$200/mo is an insane ROI.

grateful to [@sama](#) and the [@OpenAI](#) team.

feature request for [@sama](#) and [@OpenAI](#):

a lot of academic articles are pay walled, and I have subscriptions to just about every major medical journal now.

It would be game changing if I could connect all my credentials to deep research so it can access the raw papers.
